OBJECTIVE

To obtain a full time position as a software developer at Yellow.

WORK EXPERIENCE

Dec2014 - Present

GEAR systems
Design and creative-lead

My role was to help in designing wireframes, brainstorming on design, User analysis. I started my work with designing http://gearsystems.org main website which is the introductory website for this product. So I have designed whole website explaining each features of the system clearly, explaining the problem statements in a precise and concise manner, and showing them on website in a user friendly way. We are on the way submitting this project to government of Telangana, after this government of Singapore is ready to implement this project.

July2014 – Present

WSDC, NIT-Warangal
Design and creative-Team lead

My role was to design and develop websites, frameworks, and lead the design team in building posters, frontend development for different departmental websites and events.

Summer Internship

May 2015

Fashion Tv, Amsterdam

▪ Converted my passion into profession by joining fashion tv as an intern learn various type of hidden techniques for photography and designing.
http://ryphotography.co.in/
